

*Young and talented French Engineer looking for an interesting job
in the field of AI research, Web and Mobile development or Electronic design.*

IT SKILLS

Deep Learning; Machine Learning; Schematic, board, and chip design; Image, audio, signal and video processing;
Telecommunication; Modeling languages; Optimization and noise reduction; Database related skills; Git handling;
Web development; Mobile development; Agile Methods; Team Leader and project management; App Deployment;
Programming languages : Python, Matlab, Java, JavaScript, HTML, CSS, C, C#, VHDL, Mathematica, primary assembler,
React, React Native, Docker, AWS console, TypeScript, SQL, prompt engineering, Excel,

EXPERIENCES

2022–2023 **GALADRIM** — 6 month contract France, Paris

Activity: Web-Developer Full-Stack Web Mobile

Result : 7 web and mobile application built and deployed

2021 **CEA-LIST / DIASI: AI Department in Laboratory** — 6 month internship France, Saclay

Objective : Unifying detection and re-identification in a single deep network architecture for multiple object tracking

Result : Our new visual transformer algorithm simplifies current approaches while performing better than the baseline model.

2020 **University of Ljubljana** — 4 month internship Slovenia, Ljubljana

Objective : Virtual Try-On Networks independent study and implementation

Result : Technical and popularized report around CP-VTON failure, quality, measurement, dataset, and update.

2020 **ENSEA Laboratories, Themis** — 7 month research project France, Cergy

Themis is a collaborative project theme proposed to a group of about a dozen ENSEA students from the 3 years of the engineering cycle.

Objective : Design from A to Z an electronic musical instrument of synthesizer/drum-machine type.

Result : 3 PCB designs of the synthesizer main board realized and printed in autonomy.

EDUCATION

2018 - 2022 **ENSEA, École Nationale Supérieure de l'Électronique
et de ses applications** — 3-year Master's program France, Cergy

Leading French graduate school in electrical engineering, computer science and communication network.

More than 10 school professional projects were completed, such as Reinforcement Learning Solver or Relation Network Video Classifier.

Result : Graduated in major signal and artificial intelligence;

2016 - 2018 **CIV, Centre International de Valbonne** — 2-year France, Valbonne

Intensive courses to prepare nationwide competitive exams for the top French engineering schools (GEs)

Result : Qualified for Centrale-Supélec, Mines-Télécom and Concours Communs Polytechniques schools.

2013 - 2016 **Parc Impérial** — High-School France, Nice

Baccalaureate specialized in sciences - equivalent **A-levels in math with honors**

FOREIGN LANGUAGES

French : ★★★★★ native speaker
English : ★★★★★ fluent speaker with TOEIC - jan. 2019
Spanish : ★★★☆☆ intermediate level

PERSONAL INTERESTS

Following advanced courses from neurology, advanced math and philosophy to fundamental physics, poetry, and epistemology;

AI implementation; Mobile game and web-app design and development; Weekly PSL presentation and vulgarization;

Film directing, making and writing for school and personal interest; School delegate and secretary; Running;

Various association key members such as president, team manager, events organization and debate master

for student life, international film festival, gaming festival, public debate, international meeting and hackathon.
