

*Youthful and accomplished French Engineer, actively seeking enriching opportunities
in AI research, Web and Mobile Development, and Electronic Design*

IT SKILLS

Deep Learning; Machine Learning; Schematic, board, and chip design; Image, audio, signal and video processing;
Telecommunication; Modeling languages; Optimization and noise reduction; Database related skills; Git handling;
Web development; Mobile development; Agile Methods; Team Leader and project management; App Deployment;
Programming languages : Python, Matlab, Java, JavaScript, HTML, CSS, C, C#, VHDL, Mathematica, primary assembler,
React, React Native, Docker, AWS console, TypeScript, SQL, prompt engineering, Excel, ...

EXPERIENCES

2022–2023 **GALADRIM** — *6-Month Contract* France, Paris

Activity : Full-Stack Web and Mobile Developer

Result : Developed and deployed 7 sophisticated web and mobile applications, showcasing versatility and proficiency

2021 **CEA-LIST / DIASI: AI Department in Laboratory** — *6-Month Internship* France, Saclay

Objective : Led the unification of detection and re-identification within an innovative deep network architecture for multifaceted tracking

Result : Championed a groundbreaking visual transformer algorithm, surpassing baseline models in performance

2020 **University of Ljubljana** — *4-Month Internship* Slovenia, Ljubljana

Objective : Conducted an independent, comprehensive study and implementation of Virtual Try-On Networks

Result : Generated detailed technical report addressing CP-VTON failures assessments, dataset analyses, and possible updates

2020 **ENSEA Laboratories, Themis** — *7-Month Research Project* France, Cergy

Distinguished collaborative project assigned to a cohort of ENSEA students across three years of the engineering cycle

Objective : Championed the end-to-end design of an innovative electronic musical instrument, including every synthesizer functionalities

Result : Independently executed three PCB designs for the synthesizer's core board, demonstrating technical prowess

EDUCATION

2018 - 2022 **ENSEA, École Nationale Supérieure de l'Électronique
et de ses applications** — *3-year Master's program* France, Cergy

Prestigious institution specializing in electrical engineering, computer science, and communication networks.

Spearheaded over 10 ambitious projects, including a Reinforcement Learning Solver and a Relation Network Video Classifier

Result : Graduated with honors, majoring in signal processing and artificial intelligence

2016 - 2018 **CIV, Centre International de Valbonne** — *2-year Preparatory Program* France, Valbonne

Intensive preparatory program dedicated for competitive exams at top-tier French engineering schools (Grandes Écoles)

Result : Attained qualification for Centrale-Supélec, Mines-Télécom, and Concours Communs Polytechniques schools

2013 - 2016 **Parc Impérial** — *High-School* France, Nice

Received Baccalaureate specializing in sciences with an emphasis on advanced mathematics, achieving honors **equivalent to A-levels**

FOREIGN LANGUAGES

French : ★★★★★ native speaker

English : ★★★★★ fluent speaker with **TOEIC** - jan. 2019

Spanish : ★★★☆☆ intermediate level

PERSONAL INTERESTS

Passionate about continuous learning, proactive creation, and effective knowledge sharing, my diverse interests include :

AI implementation, futurism, and doomsday prediction; Mobile game and **web-app design**, development, and innovation;
Conducting engaging and enlightening **PSL presentations**; Exemplifying leadership as a dedicated school delegate and secretary;
Engaging in **film direction**, production, critique for academic or personal; Maintaining a rigorous routine of running and cycling;
Pursuing advanced coursework ranging from **neurology** and advanced mathematics to fundamental physics, **poetry**, and epistemology;
Active participation in pivotal roles for various **associations**, spanning president, team manager, event organizer, and debate master for
student life, international film festivals, gaming events, **public debates**, international conferences, and hackathons, ...
